

Minutes
Regular Meeting
September 9, 2021

Chairman Charles Hegler called the meeting to order with Commissioner Leonard Bowick, Commissioner George Yeldell, Superintendent James Robinson, Office Manager Deborah Peeler and General Manager Cheryl Daniels present.

On a motion by Commissioner Bowick, seconded by Commissioner Yeldell, the Commissioners approved the August 2021 regular meeting minutes, August 2021 accounts payable, and July 2021 financial statements as submitted.

Public and Employee Comments

There were no comments.

Deborah Peeler/Office Manager

The office staff took 6 new deposits for service during the month of August. Seven (7) customers were cut off for non-payment this month. All service has been reconnected with three exceptions. Crew members started working on the Automatic Read water meter project the week of August 9. We need to clean up serial numbers in our software for the transfer, so crew members have been checking all water meters. They completed three (3) routes this week and will resume after meters are read by billing. Operations are running smoothly in the office.

James Robinson – Superintendent

Safety training for the month of September will be Blood Borne Pathogens. The crew marked 80 locate tickets for West Carolina Telephone last month. Overall, operations are running smoothly.

Glenn Hill – Waste Water Treatment Plant

Mr. Hegler presented Glenn's report:
West Carolina ran all of the cable for our security system but has not been back to install cameras. Overall, operations are running smoothly.

Furman Parton – Water Plant

Mr. Hegler presented Furman's report:
The Thurmond Lake level started the month of August off at 330.81 ft and ended at 329.75 ft. On August 26th, the water plan took an almost direct lightning strike that knocked out our

SCADA workstation in the office and froze up the workstation on the filter console. The plant had to be run manually for the next day until MR Systems could come out and get our filter console workstation going again. A quote has been submitted to us from MR Systems for a new office workstation. According to MR Systems, they won't be able to get a new one for us until at least the end of November. We have reached out to David Tyre with GBT to contact Southern Flow about possibly getting the work done sooner. Work on the new plant construction has been steady. It is really starting to take shape. Construction of the new tank on Hwy 221 is coming along nicely. All operations at the plant have run smoothly.

Cheryl Daniels – General Manager

The water plant project is on schedule. Phoenix has finished the erection of the tank. The painting of the tank is in discussion process. The final paperwork for the waste plant project is coming together. GMC has submitted all SCDHEC permitting requirements and the contract is being reviewed.

There being no further business, meeting was adjourned.

Respectfully Submitted,

Cheryl W. Daniels
